## OUR Customer Engagement Process

### ✓ Plan

Initial team interactions to analyze and determine documentation needed to identify facility locations and descriptions for preliminary build.

### ✓ Build

Assembly and organization of your facility information and data entry of all locations, rooms, personnel, users and descriptors for entire system use.

### ✓ Launch

Your facility team comes together with ours for education and training in preparation for implementation and execution of your new Facility Adviser system.

### ✓ Support

Ongoing availability and assistance from our customer support team to ensure your team has a partner in their daily operations that they can rely on.

## THE TEAM Implementation Process

### ✓ Train

Teach your team how best to use Facility Adviser to execute in an efficient way.

### ✓ Survey

Ask your team how it's going. Gain an understanding of their needs moving forward.

### ✓ Modify

Review, analyze, and adjust where needed based on the feedback from your team.

### ✓ Develop

Reinforce best practices to ensure clear understanding and consistent execution across your teams.
